Hiring Manager

The Elite Job

Dear Hiring Manager,

I am currently pursuing a Bachelor's degree in Artificial Intelligence and am in my 6th semester. I am writing to express my interest in opportunities related to data analysis, where I can apply and further develop my technical and analytical skills.

Through my academic journey, I have built a strong foundation in data-related concepts and tools, including Python, data analysis libraries, and visualization techniques. I have also worked on personal projects involving exploratory data analysis and business-oriented datasets, where I focused on deriving insights and building structured analytical reports.

While I am still in the process of gaining real-world industry experience, I have consistently worked on improving my practical skills through hands-on projects. I approach problems with a mindset focused on finding solutions and making things work, even when the path is not straightforward. I would describe myself as someone who persists until I reach a working and meaningful outcome.

I am particularly interested in opportunities where I can contribute, learn from real-world data challenges, and grow into a more industry-ready data professional. I would appreciate the opportunity to be considered for any suitable role.

Thank you for your time and consideration.

Sincerely,

Maryam

ABOUT ME

I am a 6th-semester Bachelor's student in Artificial Intelligence with a strong foundation in data analysis, Python, and machine learning fundamentals. I have worked on multiple academic and personal projects involving data cleaning, exploratory data analysis, and visualization. I am a consistent learner with a strong ability to adapt, persist, and deliver working solutions.

EDUCATION

BNBWU | 2023-2027

BS AI

GPA: 3.95 (5th Semester)

Army Public School & College | 2020-2022

Intermediate Computer Science (ICS)

Grade: A1

Army Public school & College | 2018-2020

Matric

Grade: A1

SKILLS

Programing

- Python
- C
- C++
- Java

Data Analysis

- Pandas
- NumPy
- Data Cleaning & Preprocessing
- Exploratory Data Analysis (EDA)

Data Visualization

- Seaborn
- Matplotlib

Tools & Environments

- Jupyter Notebook
- Google Colab
- Git & GitHub (basic)

Soft Skills

- Data-driven problem solving
- Analytical thinking
- Project-based learning approach

WORK EXPERIENCE

Fresh

PROJECTS:

Retail Sales EDA:

Analyzed 2023 retail sales data to identify revenue trends, customer purchasing behavior, and product performance through exploratory data analysis and business-focused insights.

Customer Churn Prediction:

Analyzed the Telco Customer Churn dataset using EDA, preprocessing, and multiple machine learning models to identify key patterns and build a predictive churn classification system.

House Price Prediction:

Performed exploratory data analysis on a housing dataset to understand key factors influencing property prices and relationships between features and price variation.
